SUMMARY

AI product builder. **Completed a 3-month internship** at Grad Skills India Private Limited, and for the **past 5 months have been building AI products** end to end: AI agents, multi-tenant backends, and the messaging and voice integrations around them. **Winner of the Freshworks Great Agent Hackathon and the GradSkills hackathon.** Sole engineer of OmniConnect AI (760+ commits, about 1,860 tests). Strong in Python, TypeScript, FastAPI, PostgreSQL and LLM tool use.

EXPERIENCE

AI Product Builder | OmniConnect AI and hackathon products

May 2026 - Present (5+ months)

- **Owned products end to end:** idea, backend, dashboard, integrations, tests and documentation, working alone or in a small team.
- **Built four AI products in five months** (below), including two hackathon projects.

Intern | Grad Skills India Private Limited

3 months (completed)

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL

AI: LLM agents and tool use (Claude, Gemini, Gemma), OpenRouter, MCP, RAG, embeddings (fastembed), pgvector, prompt design with code-checked outputs

Backend: FastAPI, Node.js, SQLAlchemy, Alembic, REST, webhooks, Server-Sent Events, GitHub Actions CI, pytest, Vitest, Playwright

Data and Infra: PostgreSQL (row-level security), Supabase, MySQL, MongoDB, AWS (S3, DynamoDB), Docker, Kubernetes, Prometheus, Railway, Vercel

Frontend: Next.js, React, Tailwind CSS, shadcn/ui, TanStack Query, Leaflet maps

Integrations: WhatsApp Cloud API, Facebook Messenger and Instagram (Meta Graph API), Telegram Bot API, Gmail and SMTP email, Google Sheets API, Vobiz and Plivo voice calling, Sarvam and ElevenLabs speech, Freshservice, Clerk auth

PROJECTS

OmniConnect AI | One inbox for every customer conversation, AI answers first

May - Oct 2026

Next.js 16, React 19, Tailwind, FastAPI, SQLAlchemy, Alembic, PostgreSQL, Gemini via OpenRouter, fastembed, Meta Graph API, Vobiz, Sarvam, Clerk

- **Built solo, started at the SummerShip Challenge 2026:** 760+ commits, about 1,860 automated tests, 56 database migrations, 34 API routers, CI on every pull request, and dashboard types generated from the backend's API description so the two cannot drift.
- **One inbox, six channels:** website chat, WhatsApp, Facebook, Instagram, email and phone calls, with human takeover, notes, tasks and saved replies. Also a leads pipeline, contacts and segments, bookings with Google Sheets sync, a form builder, automation rules and analytics.
- **AI that refuses to guess:** policy checks first, then "understand first, look up second", then meaning-based and keyword search over the business's own documents, an answer written from those facts only, and a fact-check that sends the customer to a person instead of giving an invented claim. No invented facts in a 35-question live test.

- **AI phone agent, proven on real calls:** the AI greets the caller, answers from documents, books demos from real free slots, and saves the caller's name, business and number as a contact. English and everyday Hindi through Sarvam speech on a Vobiz number; replies in 4 to 9 seconds; silence is detected, not transcribed into made-up words. Earlier version on Plivo with signed-webhook checks, live transfer to a human agent's browser, and durable call audio with transcription.
- **Security and privacy:** Postgres row-level security under a limited database user, Fernet-encrypted channel credentials, personal data redacted before every LLM call, an AI data-residency gate, logs that mask message text and phone numbers, and a website chat locked to the visitor's own conversation.

SentinelOps AI | AI SRE agent with human-approved fixes

Winner, Freshworks | Sep 2026

Python, FastAPI, Claude tool use, Kubernetes, Prometheus, Supabase, Freshservice API and MCP, React

- **Evidence-bound investigation:** detects Kubernetes incidents from Prometheus error ratios every 15 s, then investigates with Claude in a bounded loop over 9 read-only tools (at most 14 calls, about $0.05 each). Conclusions without cited evidence are rejected.
- **Human approval first:** every fix becomes a Freshservice change request and runs only after approval, from a fixed 4-action catalog under a least-privilege ServiceAccount.
- **Self-verifying:** checks recovery for 2 minutes and rolls back automatically.
- **Tamper-evident:** hash-chained audit log in Postgres; phones the on-call engineer using Vobiz and Sarvam voice.

Fastforward | Flight simulator for PayPal Subscriptions

Oct 2026 | In progress

TypeScript, Node.js, OpenAPI, Claude, MCP, Vitest, Railway | github.com/VinayG759/FastForward

- **Fast-forwarded PayPal twin:** a stateful stand-in for PayPal Subscriptions and Disputes, built from PayPal's official OpenAPI specs. It plays a 75-day "bad month" in seconds, with AI-played customers who pay, fail or dispute.
- **Bad-weather webhooks:** sends signed events that arrive duplicated, late, out of order or forged.
- **Honest verdicts:** six deterministic checks, not the AI, decide pass or fail, so the AI cannot talk a bug into passing.
- **Verified against the real sandbox:** the first comparison found 27 differences; fixed to 0 across 7 of 7 endpoints. 376 unit tests plus end-to-end tests.
- **Built for developers:** three publishable packages, a CLI, an MCP server for coding assistants, and a demo on Railway.

Sangam | Citizen reports joined with public data

sangam-eight-blue.vercel.app

FastAPI, Supabase (pgvector, PostGIS), Gemini, Sarvam, React, Leaflet, Telegram, WhatsApp

- **Voice, photo and text in many languages:** reports arrive over Telegram, WhatsApp and web, are grouped by place and need, and joined with official Jal Jeevan Mission data (30 districts, 228 blocks of Karnataka) to flag delivery gaps.
- **Numbers you can trust:** ranking is plain arithmetic; code rejects any AI-written number not in the sourced facts.
- **Privacy by design:** reporter identities stored only as keyed hashes; groups under 5 people are never shown.

ACHIEVEMENTS

- **Winner,** The Great Agent Hackathon, Freshworks, Bengaluru (25-26 Sep 2026), Track 3: AI-native Enterprise, with SentinelOps AI.
- **Winner,** GradSkills Compete and Win: Summership 2026 (OmniConnect AI began at its SummerShip Challenge).
- **Completed a 3-month internship** at Grad Skills India Private Limited.
- **Certificate:** be10x AI Tools Workshop (Mar 2026).

EDUCATION

B.Tech, Computer Science, Presidency University, Bengaluru

2024 - 2028

Spoken languages: English, Hindi, Kannada
